

The HAF Professional Sawhorse

Make your firewood cutting simpler and more productive with the Professional Sawhorse from HAF Präzisionstechnik!

The chainsaw blade guidance prevents the blade from springing back during cutting. Designed for use with chainsaws (e. g. Stihl MS660), the matching guide rail (blade) is supplied with chain and roller guide. The 6-interval guide rail in the sawing cage can be adjusted to 25, 33, 50, 66, 75 and 100 cm as standard. Loading and unloading can be performed by hand or conveniently with a front loader. The Professional Sawhorse is available in designs varying from 1/2 – 2 cubic metres.

The benefits for you:

- > Safer firewood production through chainsaw blade guidance
- > Ideal for 1-man operation (excellent time saving compared with conventional firewood cutting)
- > Optional cutting lengths (25, 33, 50, 66, 75 or 100 cm)
- > Up to 2-m³ bundles per load
- > Simple loading and unloading using front loader
- > Transport, bundle, saw and load in one machine
- > Solid design made in Germany (fully galvanised)

Are you already familiar with our other innovative solutions?

HAF Professional Bundling Machine
Save time stacking 1-m long firewood logs into bundles of up to 1 cubic metre quickly and easily!

HAF Cleaning Drum
Reliably removes all sawdust, splinters and bark from logs and wood chips up to 0.5 metres long!

HAF Conveyor Belt
Conveniently transport your timber logs using our infinitely adjustable conveyor belt. Uphill transportation is also guaranteed thanks to the extremely robust, slatted conveyor belt!

The HAF Professional Sawhorse

Bundle and saw 1-metre logs safely and effectively in 1-man operation with our sawhorse.

Guide rails for cutting lengths of 25 cm, 33 cm, 50 cm, 66 cm, 75 cm and 100 cm

Three hand-wheels for securing the logs during sawing and to pre-stress the logs for bundling

Front: euro attachment and category I and II 3-point attachment for sawing

Side: euro attachment for tipping out 1-metre bundles of wood

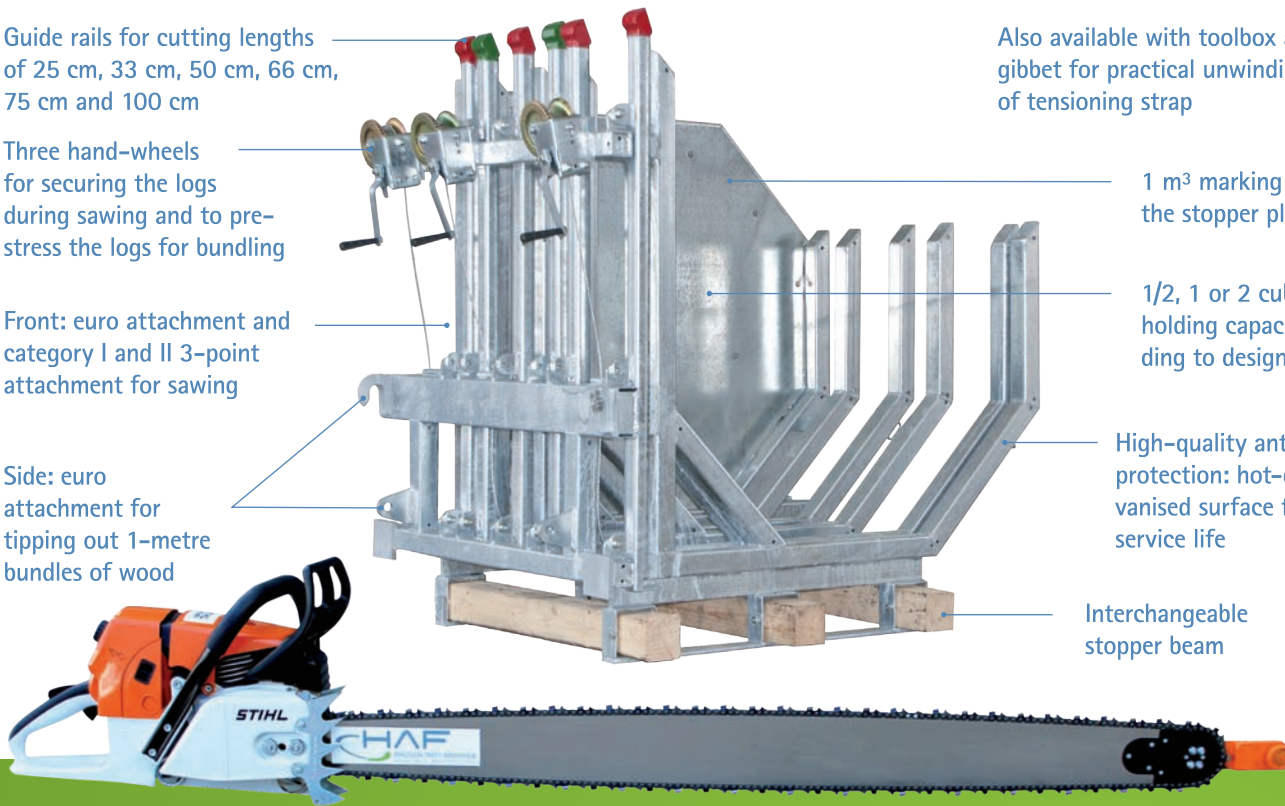

Also available with toolbox and gibbet for practical unwinding of tensioning strap

1 m³ marking on the stopper plate

1/2, 1 or 2 cubic metre holding capacity according to design

High-quality anti-corrosion protection: hot-dip galvanised surface for a long service life

Interchangeable stopper beam

HAF Professional Bundling Set

With the HAF Professional Bundling Set (available as an optional extra) you can stack wood into 2-m³ bundles (depending on the size of sawhorse selected) and load the bundles into the sawhorse using the lifting beam.

The set consists of:

- Woven polyester strap, (width = 25 mm, length = 400 m) extremely light and strong, made of polyester fibres covered with a plastic coating. Resistant to sharp edges with tear strength of 1400 kg
- Strap tensioner
- 500 phosphated clips (8 mm wire)
- 1 lifting beam with 1000 kg lifting capacity that enables fast loading and transportation of the wood bundles via front loader

Safer and more effective cutting

The guide rails that can be adjusted to cutting lengths of 25 cm, 33 cm, 50 cm, 66 cm, 75 cm and 100 cm with guide rollers on the tip of the chainsaw blade minimise the risk of the blade springing back and also ensure uniform cutting of firewood to the desired length.

So in 1-man operation, up to 1 cubic metre of wood can be processed in just a few minutes and 4-6 cubic metres in an hour.

We recommend that you use a 5kW / 7 HP chainsaw.

Simple loading and unloading

The HAF Professional Sawhorse can be loaded with bundles or loose logs and can be conveniently loaded with a front loader. After sawing the sawhorse is lifted and emptied using a euro or three-point front loader attachment.

Technical data

HAF Professional Sawhorse 1/2 cubic metre (Premium)
Overall dimensions: 1185 x 1145 x 1100 mm, weight: 220 kg

HAF Professional Sawhorse 1 cubic metre (Premium)
Overall dimensions: 1570 x 1230 x 1550 mm, weight: 280 kg

HAF Professional Sawhorse 2 cubic metres (Premium)
Overall dimensions: 3000 x 1150 x 1650 mm, weight: 560 kg

The HAF Professional Sawhorse is also available with lashing straps.
